

FEDERAL IMPACT AID SURVEY

The **2023-2024 Federal Impact Aid Survey** will be conducted on **October 4, 2023**. Each year the district earns a significant amount of income from Federal Impact Aid, which can be used for any general fund purpose such as instructional materials, salaries, transportation, or capital needs. This school year parents will have an option to complete the survey online. We thank you for your continued support in encouraging families to fill out the Federal Impact Aid Survey.

NEW Online Survey available through PowerSchool Parent Portal.

For 2023-2024, the district is piloting an option to complete the Impact Aid survey form online. Although we are still required to provide paper forms this year, the more successful the electronic returns are, the more likely we can move to a fully online format in the future.

Benefits of Electronic Surveys:

- Save administrative time by reducing manual tracking of forms
- Save time in the classroom distributing and collecting forms
- Eliminate lost forms concerns by providing direct online access to families
- Real time visibility
 - Easily identify families who have not yet submitted the survey, so reminders can be sent
 - Central office can view site returns throughout collection period and provide support as needed

Steps to increase online Survey returns:

- Encourage your families to create a Parent Portal account
- Once accounts are created, parents can download the PowerSchool App for the most seamless, on-the-go experience
 - District code KFTF for login
- Use Communications toolkit* to share the online form option through your school website, newsletters and social media
 - *Toolkit will be available from Communications prior to the **October 4, 2023** survey date
 - Remind families that the information will be kept confidential
